

Hello everyone! I'm Eva, 21 years old and I'm studying International Relations and Management at OTH Regensburg. What I particularly like about this degree program is that it gives me a generalist education and lots of opportunities to specialize in the subjects that interest me most. This allows me to try things out and see which subject areas suit me more and which less. If you have any questions about the IRM course or life in Regensburg, please feel free to contact me!
